This Question Paper consists of 39 questions and 8 printed pages.

Roll No.				Code No.	68/ESS/1
	СОМ	PUTE (33	R SCIEN 30)	ICE	
Day and Date of Examination	n:				
Signature of Invigilators :	1				
	2				

General Instructions :

- 1. Candidate must write his/her Roll Number on the first page of the Question Paper.
- 2. Please check the Question Paper to verify that the total pages and total number of questions contained in the Question Paper are the same as those printed on the top of the first page. Also check to see that the questions are in sequential order.
- **3.** Making any identification mark in the Answer-Book or writing Roll Number anywhere other than the specified places will lead to disqualification of the candidate.
- 4. Write your Question Paper Code No. 68/ESS/1-A on the Answer-Book.

COMPUTER SCIENCE (330)

[Time : 3 Hours]

[Maximum Marks : 60]

Note :	(1)	(i) This question paper consists of 39 questions in all.							
	(ii)	All questions are compulsory.							
	(iii)	Marks are given against each question.							
	(iv)								
		(b) Q.No. 13 to 24 carry 01 mark each and Q.No. 25 to 27 - Objective type q of 02 marks each (with 02 sub-parts of 01 mark each). Attempt these q as per the instructions given for each of the questions 13 - 27 .							
	(v)	Section - B consists of :							
		(a) Q.No. 28 to 35 - Very Short questions carrying 02 marks each to be answ the range of 30 to 50 words.	wered in						
		(b) Q.No. 36 and 37 - Short Answer type questions carrying 03 marks ea	ch to be						
		answered in the range of 50 to 80 words.							
		(c) Q.No. 38 and 39 - Long Answer type questions carrying 04 marks ea	ch to be						
		answered in the range of 80 to 120 words.							
NOTE :	(1)	Answers of all questions are to be given in the Answer-Book given to you.							
	(0)	15 minutes time has been allotted to read this question paper. The question paper will

Statement 2 : Input the value for the variable iname of the StructureVariable s1.

34. Write SQL queries to create the below given BUS table.

	BUS	
BUS NO	VARCHAR(6)	PRIMARY KEY
BUS NAME	VARCHAR(15)	
YEAR	INT(4)	
ТҮРЕ	CHAR	

OR

Differentiate fixed length and variable length datatype.

- **35.** Define the following terms : (Any two)
 - (a) Member Functions
 - (b) Objects
 - (c) :: operator
 - (d) Inline Member Function

36. Create a webpage using the following instructions :

- (a) Heading 'Examination' on the center of the webpage with the smallest heading font.
- (b) The Paragraph "I Feel My Exam has gone good" on towards the left of the webpage.
- (c) An image to be set having the file name "NIOS2024.jpg" with a height of 6 and width of 3.
- **37.** Define the following terms : (Any three)
 - (i) Primary key
 - (ii) Physical Data Model
 - (iii) Domain
 - (iv) Degree
 - (v) Default Constraint

38. Answer the questions from (i) to (iv) based on the below given program (assume all header **4** files are included).

```
class Graduate {
     int Rollno;
     char GName[20];
     float Marks1;
protected:
      void Result();
public:
Graduate();
     void Enroll();
      void Display();
};
class Lecturer{
     long TCode;
     char TName[20];
Protected:
     float Salary;
public:
      Lecturer();
     void Enter();
      void Show();
};
class Learn: public Graduate, private Lecturer {
long CCode[10];
char LearnName[50];
char StartDate[8], EndDate[8];
public;
Learn();
void Commence();
void CDetail();
};
      Write the names of member functions, which are accessible from objects of class Learn.
(i)
```

- (ii) Write the names of all the data members, which is/are accessible to member function Commence of class Learn.
- (iii) Write the names of all the members, which are accessible from objects of class Lecturer.
- (iv) Which type of Inheritance is illustrated in the above C++ code ?

)R

Define Virtual Base Class. Display the structure by taking an example or with syntax.

39. (i) Write a program to create an array of N elements, accept a number from the user, delete the accepted number from the array and print the new array.

4

OR

(ii) Write a C++ program that accepts two numbers (a, b) from the user and passes to a function, the function will perform (a*a) + (b*b) to the main program which will display the output to the user.
